

Place a dab of paint onto a small tray

Apply the paint from the tray or the paint stick. Then carefully apply paint onto the applicator stick. Be sure to contain paint

Repeat the application process until paint is slightly higher than surface when dry (i.e., slightly higher than surface)

Note: as the paint dries it will shrink by

6.

Flatten the surface

When paint is dry, flatten/sand down the surface with 2000 grit sandpaper.

Make sure the area is always well lubricated

Continue sanding the surface until you
